SUMMMARY

He is currently working on the synthesis / modify of polymers and chemosensors using ball-milling methods for the detection/isolation of some anionic and cationic species such as drugs, dyes and surfactants that have a strong impact on human health, Also detection of explosive material and inhibitor of corrosion .

EXPERIENCE

- I was employed in Ural University at Center for Chemical and Pharmaceutical Technologies Yekaterinburg, 21a Mira St. (engineer researcher).

Education

Received his Ph.D. Degree in Organic Substance Technology from the Department of Organic and Bimolecular Chemistry of the Ural Federal University in 2024.

Achievements

He has two international invention patents and 13 published papers in renowned journals in last two year.
