Name : Shaimaa B.Al-Baghdadi

Address of work: university of technology, center of energy and renewable energy.

College degree: Assistant prof. Ph.D.in physical chemistry.

Email: 100364@uotechnology.edu.iq

received the the B.Sc. degree in chemistry and the M.Sc. degree from department of chemistry, University of Al-nahrain/Iraq, in 2002 and 2004 respectively, and Ph.D degree in physical chemistry from Mustansiriyah University/Iraq in 2022. currently working in energy and renewable energies technology center at the University of Technology/Iraq

https://orcid.org/my-orcid?orcid=0000-0002-2166-2244

Education:

Ph.D, physical chemistry. Mustansiriyah University /Iraq ,2022.

M.Sc., physical chemistry, University of Al-nahrain /Iraq, 2004.

B.Sc., chemistry, University of Al-nahrain /Iraq, 2001.

Publication

- Experimental studies on corrosion inhibition performance of acetylthiophene thiosemicarbazone for mild steel in HCl complemented with DFT investigation, International Journal of Low-Carbon Technologies 2021, volume 16, number 14, p 181–188
- Anticorrosion and antibacterial effects of new Schiff base derived from hydrazine, Journal of Physics: Conference Series ,v 1795, no. 1, 2021
- Rheological characteristics of polyethylene-nanotube composites by capillary , International Journal of Low-Carbon Technologies, v 1 no. 6, 2021
- 4. The using of nanomaterials as catalysts for photodegradations, Journal of Physics: Conference Series, v 1853 ,no. 1 ,2021
- Computational Calculations, Gravimetrical, and Surface Morphological Investigations of Corrosion Inhibition Effect of Triazole Derivative on Mild Steel in HCl, Journal of Computational and Theoretical Nanoscience, Volume 17, Number 7, July 2020, pp. 2897-2904(8)
- 6. Inhibition Effect of Hydrazine-Derived Coumarin on a Mild Steel Surface , TRIBOLOGIA, ,volume 37 , number 13, 2020
- 7. Experimental Study of 2-Amino-5-(4-nitrophenyl)-1, 3, 4-Thiadiazole for HCl, Engineering and Technology Journal, v37 no. 2, 2019
- Experimental and quantum chemical simulations on the corrosion inhibition of mild steel by 3-((5-(3,5-dinitrophenyl)-1,3,4thiadiazol-2- yl)imino)indolin-2-one, Results in Physics, v 9, 2018

- 9. Experimental and theoretical studies of Schif bases as corrosion inhibitors, . Chemistry Central Journal v 7, no. 7, 2018
- 10. Experimental studies on inhibition of mild steel corrosion by novel synthesized inhibitor complemented with quantum chemical calculations, Results in Physics, v 10,2018
- 11. Synthesis and corrosion inhibition application of NATN on mild steel surface in acidic media complemented with DFT studies , Results in Physics, v8, 2018
- 12. Synthesis, inhibition effects and quantum chemical studies of a novel coumarin derivative on the corrosion of mild steel in a hydrochloric acid solution, Chemistry Central Journal, v10, no. 1 ,2016
- 2-(1-(Benzylimino)ethyl)phenol as anticorrosive compound supported with Quantum chemical calculations, nternational Journal of ChemTech Research, vol.9, no. 10, 2016
- 14. Computational Calculations, Gravimetrical, and Surface Morphological Investigations of Corrosion Inhibition Effect of Triazole Derivative on Mild Steel in HCl, <u>Journal of Computational</u> <u>and Theoretical Nanoscience</u>, Volume 17, Number 7, July 2020, pp. 2897-2904(8)
- 15. Experimental studies on corrosion inhibition performance of acetylthiophene thiosemicarbazone for mild steel in HCl complemented with DFT investigation, International Journal of Low-Carbon Technologies 2021, 16, 181–188
- 16. Inhibition Effect of Hydrazine-Derived Coumarin on a Mild Steel Surface , TRIBOLOGIA, , 37 ,2020
